DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "reconstituting" in line 10. There is insufficient antecedent basis for this limitation in the claim. The claim never states the step in the method where the inventory is originally constituted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Richardson (US Patent No. 5,042,809).

Richardson discloses a computerized gaming device with a method utilizing an inventory of chances, wherein a random number generator in a processor will select the order in which all of the chances (indicia) of a particular deal will be called up (Column 6, lines 60-62). The player can wager and play a plurality of hands (Column 3, lines 49-52) and as each hand is played, a

number of chances are revealed to define an outcome where the player is issued an award for a win (Column 4, lines 26-38). The remaining inventory is displayed for the user to see (FIG 3) (Column 6, lines 45-53). The device displays a matrix of chances, including a plurality of pay lines (FIG 4). A provision is made to retire a deal or game at a predetermined point when all the major winning chances have been won or the player can quit at any time or call for a reshuffle (Abstract).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent No. 5,882,258: Card game wherein the indicia of cards are displayed and the amount of remaining indicia is also displayed.

US Patent No. 6,299,531: Table game where information is displayed so onlookers and bettors can easily view and know past game results to obtain a complete history of the past games played and the results.

US Patent No. 6,443,456: Card game with multiple pay lines wherein the ability to wager and win can happen in a plurality of combinations.

US Patent No. 5,324,035: A fixed pool of game plays, with a predetermined number of wins in each game play. The player can purchase a play and when a particular pool reaches a predetermined penetration, the game is reshuffled. The amount of remaining indicia is also displayed for the user to see.
